

15 Years In Business

Serving the Aerospace & Medical Markets Since 1997

2012 marks Litron's 15th year of business. From our small beginnings as a laser systems company to our current two facility operation, the one thing that's allowed us to keep growing has been you, our customers. For that we thank you, and look forward to continuing our relationship for years to come.

In addition to it being our 15th year, this year is shaping up to be a big year all around for Litron. Our plating line in the Aerospace building is now up and running, we're about to go into full production in our Medical building on two implant devices, and we're now offering a new compact glovebox system for hermetic sealing.

Thank you again for your continued support, and we hope you will stay tuned throughout the year for the latest from Litron.

Waves of Change

What's going on at Litron?

- ▶ We're celebrating 15 years in business (see article above).
- ▶ Litron is showing at IEEE MTT-S Trade Show in Montreal, Canada June 19 - 21, be sure to stop by booth #2229.
- ▶ The plating line is now up and running
- ▶ Keep an eye out for the announcement about our open housing this spring/summer.
- ▶ We just finished up our second round of Kaizain events for 5S Training.
- ▶ American Microwave featured in our Customer Spotlight, see Page 2.

Department Profile

Zach Wilson, Hermetic Package Fabrication Process Engineer

Zach Wilson
Process Engineer

As a 2010 Bachelor of Science in Mechanical Engineering graduate of Worcester Polytechnic Institute, Zach Wilson came to Litron in June of 2010 as a process engineer in training for our hermetic package fabrication department. At the onset Zach's job focus was helping out with the machines while learning how Litron meets and exceeds our customers expectations.

Since that first summer Zach has moved on to become a full time Process Engineer for the hermetic package fabrication department. His day to day tasks include documenting processes, developing programs and assisting with running the machines. "Working at Litron has been a constant learning experience. Meeting or exceeding customer expectations is always a top priority here and I look forward to expanding my proficiency to ensure our customers stay satisfied" says Zach.

Litron would like to thank Zach for his hard work and dedication and we look forward to seeing you develop your skills with us.

Customer Spotlight:

*American Microwave Corporation
Consistently achieving the highest ratings*

For more than three decades American Microwave Corporation (AMC) has been the leading supplier of high performance microwave control components and subsystems to the defense and commercial electronics market. Founded in 1978 and based out of Frederick Maryland, American Microwave is dedicated to providing state-of-the-art technology, while exceeding the expectations of their customers.

“Litron’s support of quick turnaround services has allowed AMC to consistently achieve the highest ratings...”

*John Guenard
Director of Sales and Marketing*

With over thirty years of experience, AMC’s custom assemblies incorporate a variety of functions including amplifiers, filters, couplers, and power dividers with attenuators and multi-throw switches. Their solid state switches and control products are in high demand and utilized by some of the biggest names in the industry; BAE Systems, Northrop Grumman, Raytheon and various Government labs to name a few.

High Quality and Quick Turnaround

Together Litron and American Microwave share the same goal of consistently exceeding customer expectations for quality, delivery and customer service. “Litron’s support of quick turnaround services has allowed AMC to consistently achieve the highest ratings with customers for quality and on-time delivery” says John Guenard, American Microwave’s Director of Sales and Marketing.

“For as long as Litron has been hermetically sealing electronic packages, American Microwave has been a customer,” says Paul Kowal, Litron’s Hermetics Manager. “AMC made it clear from our first discussion that turning their parts around as quick as possible, with no quality issues is absolutely critical, and we’ve held ourselves to those standards ever since.”

Years of Continued Support

From the beginning American Microwave and Litron have been able to work together to provide a superior solution to their customers. “I remember visiting your facility in Western Massachusetts in the late 90’s when Litron was just starting out. Today, a reference to Litron signifies an emphasis on quality and first rate service to our customers,” says Guenard.

Litron would like to thank American Microwave for their continued collaboration and support of our services throughout the years. It has been customers such as AMC that have helped Litron to grow with the ever increasing requirement flow down. We look forward to another 15 years working with American Microwave to surpass their customers standards.

American Microwave Corporation is a leader in the design & manufacturing of DC to 40 GHZ solid state control components.
