

## A True Leader of Industry

### *Litron's CEO Ron Lalli*

In addition to starting Litron 18 years ago and continuing to be the active CEO, Ron has built many extremely successful businesses over the past 53 years. His leadership and forethought has allowed each of those companies to grow and evolve into industry leaders in their respective markets.

Here's a look back at Ron's professional history and why Litron and others are proud to call him CEO.

### **Co-Founder of EBTEC**

EBTEC was one of the first Electron Beam Welding and Laser sub-contracting facilities in the country serving all of the major aerospace, medical and micro-electronic industries in addition to manufacturing Laser and EB Welding Systems.

### **Co-Founder of Belt Technologies**

Belt Technologies Inc. was an outgrowth of EBTEC and the first company to build in the Agawam Regional Industrial Park. BELT Technologies manufactures metal tapes and belts used in a wide range of industries for the transporting of materials.

### **Co-Founder Energy Beam Services Inc.**

Energy Beam Services, Inc. was also an outgrowth of EBTEC, located in the Belt Technologies building in Agawam. Energy Beam Sciences is a manufacturer of filaments and apertures used in the electron beam microscope industry. EBS served medical research labs, universities, hospitals and electronics industries.

### **Co-Founder Texcel Medical**

Texcel provided hermetic laser welding and marking services to the microelectronic, medical surgical instrument and medical implant industries.

53  
53 Years in Industry

### **Founder & CEO Overhaul Support Services**

OSS provided the helicopter industry with the front-end portion of overhaul process, dealing with all of the main, intermediate and tail gearboxes, main and tail rotor assemblies and helicopter blade refurbishment.

### **CEO PTI Industries**

PTI provides non-destructive test services, specialized coatings, precision cleaning, cleanliness testing and foreign particle cleaning for the medical, aerospace, and aircraft engine industries. Its Bonded Products Division is a manufacturer of bonded and composite products for the aerospace, aircraft and commercial industries. PTI is an FAA approved overhaul facility for bonded and composite aircraft engine components and a supplier of maintenance-free commercial bearings.

### **A True Mentor**

Ron's leadership goes beyond building companies. Under his guidance and training, four of his employees have become executives and presidents of his companies and four started their own. His guidance for those running his companies and those who have started their own continues on to this day.

Thank you for your continued guidance!
