

A Look Ahead

What does 2013 have in store?

While we may not be able to predict the future, we are able to give you an inside scoop on what we anticipate for the new year.

As 2012 is quickly winding down, we here at Litron are actively planning for the coming year. With our growing customer base and our existing customers increased order demands, we're looking forward to another year of steady growth.

ISO 13485 Certification is under way, NADCAP Certification is in the works and AS9100 Certification is in the not too distant future. In addition to the added certifications, we'll be strategically improving both the facilities and equipment to better utilize our floor space and allow operators to be as efficient as possible.

Stay tuned for updates throughout the year!

Waves of Change

What's going on at Litron?

- ▶ Joe Katusich has recently joined our Laser Services Division as a Production Quality Engineer (see below).
- ▶ Our plating line is steadily working towards NADCAP Certification, with the addition of a Chemical Engineer.
- ▶ Several Litron employees competed in the Rugged Maniac Mud Run this September (congrats to all that ran).
- ▶ Did you know Litron is more than just lasers? See page 2 for an overview of our full line of service offerings.

Department Profile

Joe Katusich - Quality Engineer

Joe Katusich
Quality Engineer

With over twenty-eight years of manufacturing experience and the last eight years as a Quality Engineer in the Medical Device Industry, Joe Katusich is a welcome addition to the Litron team. Prior to being a QE, Joe had various positions within quality for the commercial, automotive and aerospace industries working as a supervisor for metrology departments as well as inspection and R&D engineering.

Joe started with Litron in May of this year and currently holds the position of Production Quality Engineer. Joe says "In my short time at Litron Medical, I've found it to be unique and challenging which I feel is a direct result of our continued growth and success. Litron's team of professionals takes pride in satisfying the diverse needs of our customers and is a great team to be a part of. I look forward to the future growth of Litron and the challenges and success that it brings."

Joe has been tasked with bringing a higher level of analysis and statistical processing to each of the jobs that runs through our shop. Litron welcomes Joe aboard and we look forward to seeing his efforts

Did You Know?

We're more than just lasers!

Since our inception, Litron has always been the place to go to for almost everything dealing with lasers (welding, hermetic sealing, cutting, marking, etc). Those items are still very much a part of our core services, but did you know, that we're more than just lasers? We have an entire division, at it's own facility, dedicated to machining, plating and feedthru integration. We have another division dedicated to implantable medical device assembly.

All of these services are run from our two facilities located at Litron Aerospace (45 Bowles Rd, Agawam MA) and Litron Medical (207 Bowles Rd, Agawam MA). We invite you to stop by, take a tour and see how Litron's turn-key manufacturing services can help support your needs.
