Dear Valued Supplier,

As part of our ISO-13485 commitment, Marox has developed a supplier rating system. We rate our suppliers on three categories.

Delivery	33.33%	
Quality	33.33%	
Quantity	33.33%	The total achieved rating can be 100%.

For Delivery, we allow plus or minus three days from the required due date on our purchase order. Quality will be compliance to the specification including paper work (certification). Quantity will be for lot quantity. Missing pieces will be held against the supplier.

Overall supplier rating is calculated at the end of each year from the totals of each category. Each category is given 33.33% if no problems are detected. If a problem is detected during receiving inspection, i.e. a missing or incorrect certification, the supplier will receive a zero for that lot's category under "Quality".

If the supplier's grand average for each category was: 30% + 28% + 33%, the total rating would be 91% for the year.

Please note: MAROX considers performance ratings of 80 to 100% acceptable. Performance ratings between 60 and 79% are marginal, requiring improvement efforts. Any performance rating below 60% requires a corrective action plan. Please submit a corrective action plan no later than 30 days from receipt of this letter addressing the area of concern. Failure to respond with a corrective action plan may result in removal from our Approved Supplier's List.

Out of 10 lots processed, your overall quality rating for 2008 was: **100%**, based on the following averages:
33.33% Quality 33.33% Delivery 33.33% Quantity

Your overall rolling Quality Rating is: 97.04%

If you have any questions or would like a complete copy of the receiving inspection log, please feel free to contact me. **Also, please send your latest copy of your ISO or NADCAP certificate to up date our files.**

Sincerely,

Marox Corporation

Norm Schloesser
