July 8, 2007

Dear Mr. Plasse:

I would like to offer my sincere thanks for the services provided by Litron during my visit on July 5, 2007. This work was in support of Sunpower's NRA program from NASA Glenn Research Center to develop high efficiency Stirling engines for space exploration. Due to the nature of our work, our windows for performing critical processes such as laser welding are narrow, subject to change, and intolerant of delays. Mike Chmura and Pete Gotta at Litron have been exceptional in accommodating our challenging needs.

During this last visit Pete Gotta worked with us during second shift operations to complete the job. It was a very long, grueling night and Pete worked patiently, efficiently and with great attention to detail to get the job done. As we have seen with Pete in the past, he is completely customer-focused and keeps our satisfaction as the highest goal. Additionally, he was friendly and personable and made the work enjoyable. He is to be commended for his effort and I truly appreciate his contribution to your team.

Thanks again for your service and collaboration and I look forward to working with Litron again in the near future.

Best Regards,

Kyle Wilson
Engineering Program Manager

Cc: Pete Gotta, Mike Chmura
