

LASER SYSTEMS

Custom Built Laser Welding, Cutting & Sealing Systems

Flexible Class I & IV Laser Systems that Build In-House Capabilities

Litron develops world-class laser systems for glovebox hermetic sealing and laser welding. The moment you're ready to bring hermetic sealing inside, we'll be ready to support you with the same proven high precision components Litron's state-of-the-art facility uses every day:

- TRUMPF YAG Lasers
- GE Fanuc controllers
- MBraun glove boxes
- Litron's Toolworker™ Software

From concept through installation, training and support, we bring world-class standards to you.

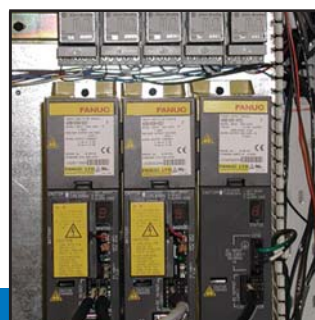

We Use The Systems We Build

We not only stand behind our systems, we use the exact same equipment for our own contract services! We know first-hand that our equipment has ultra-high reliability and the flexibility to suit a wide range of production needs.

From Design thru Production, We Can Help

Our engineering staff can assist in the optimal design of a custom laser system to meet your toughest industry and application requirements. Because we provide a wide range of outsourcing and job-shop services, we're pros at adapting systems for seamless custom production with strict adherence to specifications and quality.

Test our problem-solving mettle today! You'll find that we're generous with our knowledge. At Litron, there are no process secrets or magical solutions with a high price tag attached.
